

Demonstration of Proposed Features

Date	14 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document summarizes the major implemented features of the Personalized Networking Assistant and their demonstration status. The features reflect the actual full-stack application, including secure profiles, factual verification, Gemini-powered networking generation, persistent history, feedback, and analytics.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	User Registration & Profile	Secure registration, login, and professional profile customization with role, interests, company, and career goals.	Implemented	Yes	Profile workflow completed.
2	Plan Selection	Supports Basic, Executive, and Enterprise-oriented onboarding and configurable plan inputs.	Implemented	Yes	Plan selection demonstrated.
3	Wikipedia Factual Verification	Retrieves factual background for event-specific topics and discussion context through the Wikipedia REST API.	Implemented	Yes	Factual snippets displayed.
4	Gemini Networking Generator	Uses Google Gemini with user and event context to generate personalized networking content across 22 practical categories.	Implemented	Yes	Personalized output generated.
5	History & Persistence	Stores generation history, event metadata, user data, and related records in SQLite.	Implemented	Yes	Saved history demonstrated.
6	Feedback & Analytics	Collects ratings, likes, dislikes, and comments and presents generation and satisfaction metrics.	Implemented	Yes	Dashboard workflow demonstrated.
