

Project Demo Planning

Date	14 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Project Demo Planning:

This document outlines the demonstration plan for the Personalized Networking Assistant. The demo presents the actual full-stack workflow, including user profiles, plan selection, Wikipedia factual verification, Google Gemini generation across 22 networking categories, SQLite history, feedback, analytics, and deployment.

S.No	Demo Section	Description	Duration (mins)	Responsible
1	Introduction	Introduce the project objective and the difficulty users face when starting relevant professional networking conversations.	2	Project Developer
2	Solution Overview	Explain the React and TypeScript frontend, Node.js and Express backend, SQLite database, Gemini AI, Wikipedia integration, and overall workflow.	3	Project Developer
3	Live Feature Demonstration	Demonstrate registration, profile setup, plan selection, factual lookup, personalized 22-category generation, history, feedback, and analytics.	6	Project Developer
4	Architecture & Data Flow	Explain how browser requests reach Express services, use Gemini and Wikipedia, and persist user, history, and feedback data in SQLite.	2	Project Developer
5	Deployment & Future Scope	Present the Render deployment workflow and discuss possible future integrations, richer factual sources, and scalable database infrastructure.	2	Project Developer
6	Conclusion & Q&A;	Summarize the implemented project and answer questions about functionality, architecture, security, database, AI integration, and deployment.	3	Project Developer

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why professionals, students, and event participants need personalized, context-aware support for starting meaningful networking conversations.
2	Solution Overview	Present the React/TypeScript frontend, Node.js/Express backend, SQLite database, Google Gemini generation, Wikipedia factual verification, and secure server-side integration.
3	Live Feature Demonstration	Show registration and profile setup, plan selection, event or topic input, Wikipedia factual lookup, Gemini generation across 22 categories, history, feedback, and analytics.
4	Q&A; Session	Answer implementation questions and discuss deployment, security, persistence, limitations, and future improvements such as richer integrations and scalable database infrastructure.
